

FALKE 5-30x56

The 34 mm scope with premium fittings.

The wide adjustment range combined with parallax compensation enables accurate shots at short distances as well as ranges out to more than 1,000 m, even under adverse lighting conditions.

High-grade lenses with maximum light transmission ensure an exceptionally bright and clear image.

The fine Sports Dot reticle can be lit red at 11 brightness levels and only displays a cross in the central area for maximum precision shots. The 1 cm at 100 m MRAD click adjustment towers are protected by solid screw-on caps.

Delivery includes dust protection caps, a sun visor, a screw-on magnification adjustment lever and a kill-flash system.
